

Aerial Lift Training Edmonton

Aerial Lift Training Edmonton - An aerial work platform is a mechanized access platform. This particular machine provides access to otherwise not accessible places for people or equipment. Likewise called an elevating work platform or aerial device, the machine is usually used to access high areas. Maintenance and construction staff normally need to make use of aerial work platforms on the job. They are used by firefighters for emergency access.

Designed for temporary use, aerial work platforms are different from elevators, that provide permanent access to high places. An aerial work platform is meant to be operated by one person, and could lift weights of not more than one ton. Some types have load limits that are higher. There are different kinds of aerial work platforms; for instance, there is a "scissor lift" and a "cherry picker".

Some aerial work platforms are available outfitted together with electrical outlets or compressed air connectors for power tools. For specialist jobs, such as lifting frames for window glass, an aerial work platform can come with special tools.

Individuals who would like to operate an aerial lift device should undergo training. Typically, the members of a Health & Safety Committee and their representatives are responsible for the inspection of every equipment and work areas and are also needed to undergo training. Trainees would become familiar with aerial lifting device operation. They would likewise learn the regulations which apply to safely utilizing these devices. Regulations vary from province to province, and in worksites that are federally regulated.

Any worker who is needed to work near or lifted by an aerial lifting device should be told regarding possible hazards. An Aerial Lift Training Video could be shown in a general safety session to educate all of the workers who are lifted by them or work near them.

Aerial Lift Training Program includes modules focused on the following: Aerial Lift Devices and Operating Controls; Hazard Identification; Platform Positioning & Park Positioning and Pre Operational Checks for Aerial Lift Devices. The program is intended to train employees on safely operating self-propelled, elevated work platforms and boom supported, self-propelled, elevated work platforms. A certificate would be provided to employees who finish the program, signed by a person qualified to be able to confirm the successful completion of a hands-on practical exam.
