

## Bucket Truck Training Edmonton

Bucket Truck Training Edmonton - The Vehicle-Mounted Aerial Work Platform or bucket truck training program is designed to decrease the risk of incident and personal injury while working in close proximity or with bucket trucks by effectively training operators who are qualified. An aerial lift device refers to whichever vehicle-mounted device, articulating or telescoping, or both, that is used to position employees to reach locations that will otherwise be inaccessible. Aerial lift devices are made use of to elevate personnel to above-ground work locations.

The goal of the program is to provide operators with the knowledge, skills, abilities, and training materials required in order to learn to operate vehicle-mounted aerial work platforms effectively and safely.

The program has two parts: a hands-on session and a classroom training session. To become certified, participants have to be successful in both parts. A wallet-size certificate and a full-size certificate will be given upon finishing the program.

The kinds of lifts examined in the program consist of Aerial lift devices are normally constructed with wood, metal, fiberglass, reinforced plastic or other materials.

### Definitions

Articulating boom platform: has at least 2 hinged boom parts.

Extensible boom platform: has an extensible or telescopic boom.

Platform: the component of an aerial device which is designed to carry staff.

Mobile unit: any aerial device along with its parts like for instance vehicle and related machine.

Employees who work with aerial devices have the responsibility of ensuring that they are properly authorized and trained. Workers should make certain that people who are not authorized and trained do not make use of lift devices. Workers must make sure that they put on the proper protective equipment while working from the platform.

Course content consists of operating the vehicle-mounted aerial work platform, pre-shift inspection, safe operating practices, lifting capacity, use of emergency controls, and administering theory and practical tests. Operators would know rules under the local and federal regulations.
