

Counterbalance Forklift Training Edmonton

Counterbalance Forklift Training Edmonton - Counterbalance Forklift Training courses are always in high demand. The Counterbalance forklift is a forklift that is designed with a weight which counters the balance, evenly distributing the weight of the load across the forklift arms. Counterbalance forklifts are designed so the weight on the lift is counterbalanced by the weight behind the centre of gravity. The load is projected out from the machine's front so it is visible to the driver of the forklift. This type of forklift truck must only be used on prepared surface or on stable, level ground.

Training is needed for forklift drivers to know the right way to spread the load equally across the arms of the forklift. Trainees will be taught how to raise and lower the load vertically and how to tilt the mast of the forklift both backwards and forwards between 5 and 15 degrees. Trainees would be taught the RTITB standards needed for safely operating the forklift. People training would also become familiar with the kinds of attachments for the arms of the forklift.

Types of Counterbalance Forklifts:

Walkie Pallet Trucks

Walkie Pallet Truck is a counterbalance forklift suitable for getting into areas which are small and cramped. This lift is very maneuverable and can access practically any tight spot.

Walkie Stackers

The Walkie Stacker varies from the Walkie Pallet truck mostly in terms of lift height. The Walkie Stacker could access tight areas and has extra lift for high stacking capability. Neither of the Walkie line of lifts could be ridden. The driver has to walk behind them.

Rider Pallet Trucks

Rider Pallet Trucks are made to be ridden. These riding lifts are perfect for dock unloading and loading.

Wave Work Assist Vehicle

The counterbalance forklift called the Wave Work Assist Vehicle can reach heights as much as 17 feet.

Sit Down Counter Balanced Trucks

The Sit-down Counterbalance Forklift is made in three-wheel and four-wheel forklift designs. These tough and durable trucks are designed to be ridden.
